Relevant Experience

Software Developer - **Imagine Apps**

Mar - Dec 2023

- Created web pages and applications using React, Angular, and various libraries
- Provided ongoing support, resolved issues, and optimized code for improved performance and maintainability
- Conducted detailed code reviews, ensuring quality, standards adherence, and issue identification
- Managed NoSQL and SQL databases, handling data modeling, query optimization, and ensuring security
- Designed and implemented APIs for seamless integration and efficient communication between components and external services

Frontend Developer - **Blockdemy**

May - Nov 2022

- Responsible for creating the main website page and providing ongoing project support, ensuring seamless functionality and user experience
- Implemented automated systems for updating event dates on the website, ensuring accuracy and timeliness without manual intervention
- Developed efficient automated processes for delivering guides, ensuring swift and hassle-free distribution to users
- Executed comprehensive unit tests for each website component, guaranteeing the reliability and performance of individual parts of the web application

Full Stack Developer - **Amazonias RGA**

Jan 2021 - Feb 2022

- Created robust APIs and web applications, focusing on functionality and user experience
- Conducted meticulous manual and unit testing for each feature, ensuring quality and reliability
- Defined project structure and selected appropriate tech stack, optimizing development workflow
- Prepared comprehensive documentation, providing clear guidelines for project understanding and future development
